

WHAT IS CLAIMED IS:

Claims 1-23. (cancelled)

24. (currently amended) A user operated computer program execution device ~~accessible~~ connectable to a server via a network and having at least a display device, wherein a performance information file includes sequence information that constitutes a performance and flag information that defines movements or expressions of characters that appear in the sequence information, the user operated computer program execution device comprising:

means for processing movement data ~~files that is~~ stored in the user operated computer program execution device, the movement data files including movement ~~different~~ data corresponding to the flag information;

means for receiving from the server the performance information file by the computer program execution device;

means for composing the performance by selecting from the movement data the data that corresponds to ~~the sequence information and~~ the flag information registered on the performance information file to define the movements and expressions of characters and utilizing the sequence information to order the movement data; and

program display means for displaying the composed performance on the display device.

25. (currently amended) A communication system having a network, a server, and an entertainment system ~~accessible~~ connectable to the server via the network wherein a performance information file includes sequence information that constitutes a performance and flag

information that defines movements or expressions of characters that appear in the sequence information, the entertainment system comprising:

means for processing movement data files ~~that is~~ stored in a computer of the entertainment system, the movement data files including movement ~~different~~ data corresponding to the flag information;

means for receiving from the server the performance information file by the computer;

means for composing the performance by selecting from the movement data the data that corresponds to ~~the sequence~~ and the flag information registered on the performance information file to define the movements and expressions of characters and utilizing the sequence information to order the movement data; and

program display means for displaying the composed performance on a display device of the entertainment system.

26. (previously presented) The communication system of claim 25, wherein the entertainment system is adapted to transmit contributed texts of users to the server.

27. (previously presented) The communication system of claim 25, wherein the entertainment system is adapted to display an opening image on the display means during a reception of the performance information file from the server, and displaying the series of the performances after the reception of the performance information file is completed.

28. (currently amended) A user operated computer program execution device ~~accessible~~ connectable to a server via a network, comprising:

means for processing movement data files that is stored in the user operated computer program execution device, the movement data file including ~~different movement~~ data corresponding to the flag information;

means for receiving from the server a performance information file by the computer program execution device;

means for composing a performance by selecting from the movement data the data that corresponds to ~~a sequence and a~~ the flag information registered on the performance information file to define the movements and expressions of characters and utilizing the sequence information to order the movement data; and

program display means for displaying the composed performance on a display device of the computer program execution device;

wherein the performance information file includes the sequence information that constitutes the performance and the flag information that defines movements or expressions of characters that appear in the sequence information.

29. (cancelled)
